

Phytic acid Al-salt

Formula: $C_6H_{18}O_{24}P_6 \cdot xAl$

Origin: **Synthetic**, as described in **He et al. (2006)**

CAS:

Acquisition mode: **transmission**

Monochromator: **Si(111)**

The monochromator energy was calibrated against the “white line” of tricalcium phosphate ($Ca_3(PO_4)_2$) at **2152.7 eV**.

Contact Person: **Christian Vogel**
